

Actuary: Evidence of the Product Running

Generated 2026-07-31. Live mirrors of this evidence: repo folder Product_Evidence/, plus the public leaderboard at actuary-695835808761.us-central1.run.app (counters update continuously).

1. Google Cloud Run deployment (production)

```
service: actuary    region: us-central1    revision: actuary-00003-4pr (serving 100%)
created: 2026-07-31T17:30:19Z    built from source with Cloud Build
public URL: https://actuary-695835808761.us-central1.run.app
endpoints: / (leaderboard) /health /v1/scores (free) /v1/score (paid, x402/Gateway)
```

2. Autonomous probe fleet (agent execution log, latest round)

```
total probes on record: 315    services covered: 40    since: 2026-07-31T01:19:47.161Z
scheduler: com.actuary.probe, one round every 30 minutes, unattended
```

```
[actuary] 38/40 up_402      270ms  api.aisa.one/apis/v2/financial/filings/items
[actuary] 39/40 up_402      262ms  api.aisa.one/apis/v2/financial/financial-metrics
[actuary] 40/40 up_402      270ms  api.aisa.one/apis/v2/financial/financial-metrics/snapshot
[actuary] round complete: 40 probes, 0 probe-side errors, 0 grading gaps
```

3. Gemini API usage (production LLM)

```
model: gemini-flash-latest    project number: 280514469684 (AI Studio)
call site: src/probe/grade.ts (public repo) · structured JSON grading of every paid probe response
grade weight: 25% of composite trust score · 30s abort signal guards the unattended fleet
```

4. Real USDC settlements (on-chain, independently verifiable)

```
agent wallet: 0x91d81258fbfb005376b8589eca5f852a223be9ce (Circle Agent Wallet, 2-of-2 MPC)
explorer: testnet.arcscan.app/address/0x91d81258fbfb005376b8589eca5f852a223be9ce
gateway deposit tx: 0x9dba7cae1a784bf5a5962272560d3a2a7e44c6d092164d658f20b1ab4a8845a3
    (verify: curl rpc.testnet.arc.network eth_getTransactionReceipt -> status 0x1, block 54517956)
5 scorecard sales settled via Circle Gateway; references in the revenue evidence PDF
```

5. Billing invoices note

The project started 07-30-2026; Google Cloud issues monthly invoices after month close, so the July invoice PDF does not exist yet at upload time. Current-period costs are at or near free tier (under \$1). The July invoice PDF and a Gemini observability dashboard screenshot will be added to this submission and to the repo's Product_Evidence folder when issued (submission remains editable until Aug 17).
