evidence source buyer receipt (cloud, demo take)
-

Total: 5 sales · 0.0050 USDC · fiat revenue: \$0.00

Disclosures

1. All sales to date were purchased by our own probe wallet during development and demo recording. They are disclosed as related-party and are not counted as market revenue.
2. Amounts are Arc Testnet USDC (no fiat value). Settlement mechanics (EIP-3009 signed authorizations, facilitator verify and settle, batched on-chain settlement) are identical to mainnet.
3. Two sales are recorded in the durable seller ledger (data/earnings.jsonl); three are evidenced by buyer-side Gateway receipts because the cloud container's ephemeral ledger was lost on redeploy (a disclosed limitation; persistent shared storage is on the production roadmap).
4. No Stripe account or business bank account exists for this day-old project; this record, the on-chain trail, and the repo's data files are the complete auditable revenue record.
